8. ☒ Examiner's Statement of Reasons for Allowance
9. ☐ Other _____

Election/Restrictions

1. Claims 50-55, 62-67 and 77-81 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 1, 3-28 and 30-49, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on 4/23/2003 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

2. Claims 1, 3-28, 30-55, 62-67 and 77-81 allowed.
3. The following is an examiner's statement of reasons for allowance:

In claims 50 and 78, Applicant has claimed a device comprised of a plurality of process chambers with each chamber defining a volume, at least one distribution

Art Unit: 1743

channel connecting the plurality of process chambers, and a solid phase extraction material such that the device is operable to remove small negatively charged organic molecules. The solid phase extraction material is comprised of solid hydrophilic particles of a hydrophilic solid support partially embedded within a hydrophobic matrix and, in addition, the solid hydrophilic particles comprise molecules different than the hydrophobic matrix. The Examiner did not find prior art that teaches or suggests the extraction material. The Examiner had previously applied the Dusterhoft reference and considers it to be the closest reference to the extraction material teaching. In the Interview on 4/23/07, Applicant successfully argued that the prior art reference Dusterhoft did not teach a solid phase extraction material comprised of solid hydrophobic particles in a hydrophobic matrix **wherein the solid hydrophilic particles comprise molecules different than the hydrophobic matrix.** Dusterhoft instead teaches that the hydrophobic and hydrophilic particles are contained in the same polymer. Claims 1, 20, 26, 28 and 47 recite methods of using the device(s) of claims 50 and 78. Therefore, the method claims are also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
